DETAILED ACTION

Claim Objections

Claim 1 and 17 are objected to because “a upstream” should be --an upstream--.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-13 and 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11 and 27 depend on claims 3 and 19, respectively, which have been cancelled. Claims 11 and 27 cannot be considered on the merits by assuming dependency on the independent claims because that would result in duplicate claims in conflict with claims 6 and 21.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6, 17, 21, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakagawa et al. (US 5,258,815).

Nakagawa et al. disclose a fixing member (11a), a pressuring member (11b), a conveying unit (17, 16a, 16b), a guide member (14; note that the member includes portions that extend both

Art Unit: 2852

horizontally and vertically), as shown in figure 1, a first conveyance roller (16b), a plurality of second conveyance rollers (16a, 17). The horizontal portion of the guide member (14) has downstream portion disposed on a line that passes a contact portion between the first conveyance roller (16b) and an upstream side second conveyance roller (16a) and a second upstream end portion of the guide member (14).

Regarding claim 5, a part of the first conveyance roller (16b) is disposed on a line connecting the conveyance position (between 16a and 16b) and a contact portion (between 11a and 11b).

Regarding claim 6, the guide member (14) is along a direction of a line that intersects with a tangential line of the contact portion.

Regarding claims 17, 21, and 22, the electrophotographic apparatus also includes image-forming process, transfer process, and an ejecting process, col. 3, lines 58-60, which read on a sheet feeding section and an image forming section.

Allowable Subject Matter

Claims 33 and 34 are allowed.

Claims 4, 7-10, 14-16, 20, 23-26, 30-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
